Profile

Developer who enjoys the whole path from idea to working product: modelling the system, designing the interface and getting it live. Combines an eye for clean, user-friendly design with a structured, detail-oriented approach to code. Looking for a web development internship to contribute to a real product and grow within an experienced team.

Education

THOMAS MORE UNIVERSITY OF APPLIED SCIENCES Bachelor in Applied Computer Science	Geel, Belgium 2024 – 2027
SOFTUNI — SOFTWARE UNIVERSITY Software Development Courses (Object-Oriented Programming)	Bulgaria 2022 – 2023
7TH HIGH SCHOOL "SVETI SEDMOCHISLENITSI" Secondary education, profile in Foreign Languages & Mathematics	Bulgaria 2019 – 2024

Projects

PATHLY — LEARNING & RESEARCH TRACKER <i>Laravel, Livewire, PostgreSQL, Reverb, Redis, Pest, Docker</i>	Personal project In progress, 2026
- Web app that turns a subject into a structured curriculum plan, with resources tracked on a checklist/kanban board, built to help users finish what they start - Building real-time progress and streak updates over WebSockets (Laravel Reverb) and a reminder system with Laravel Scheduler, queues and notifications, backed by Redis - Tested with Pest and containerised with Docker for deployment on my own VPS	
THE ANDERSONS — HOUSEHOLD MANAGEMENT APP <i>Trips Management developer, team of 6 · Laravel, Livewire, Alpine.js, Tailwind CSS, Leaflet</i>	Thomas More Feb 2026
- Owned the Trips Management module end to end: destinations, dates, member participation, checkpoints, and trip document upload and download - Built an interactive trip map with Leaflet that geocodes checkpoints (OpenStreetMap Nominatim), draws driving routes between them (OSRM) and shows total distance and confirmed stops, with caching and a straight-line fallback when routing fails - Worked in a Scrum team with weekly stand-ups, sprint planning in Jira, and regular client meetings to gather requirements and demo progress	
SELF-HOSTED DEPLOYMENT SERVER <i>Hetzner VPS, Coolify, Docker, Linux</i>	Personal project 2026
- Rented and configured a Linux VPS with Coolify to deploy and host my own web applications - Manage Docker-based deployments and custom domains for my portfolio projects	

Technical Skills

Languages	PHP, C#, JavaScript, SQL, HTML, CSS
-----------	-------------------------------------

Frameworks	Laravel, Livewire, Alpine.js, Tailwind CSS, .NET, React
Databases	PostgreSQL, SQL
DevOps & cloud	Git, Docker, Linux VPS, Coolify, AWS, Azure
Software design	UML, ERD, use cases, requirements analysis, unit testing

Additional

Soft skills	Problem solving, critical thinking, attention to detail, creativity, adaptability, teamwork
Languages	Bulgarian (native), English (C1), Spanish (B1), German (A2)
Activity	Hackathon — Recharge Eindhoven: Grid Congestion Hackathon, High Tech Campus Eindhoven, October 2026
